1. Remove existing trailer ball hole cap on center of bumper and discard.

2. Loosely install hitch with hex bolt and washer to bumper beam.

3. Insert pull wire through mounting hole and out of tube 1-1/8".

4. Route carriage bolt and reinforcement plate through bumper beam and hitch mounting slots (2 pieces).

5. Attach washer & nut and tighten to 80 ft. lbs. torque.

6. Install new bumper cap over bolt & receiver cover into hitch.

Tighten bolt in step 2 to 300 ft. lbs. torque.
